

Your study visit!

We want to share what to expect from your visit...

1) Welcome!

You will travel to the Birkbeck ToddlerLab. We will meet you at the front door.

2) Get ready!

We will go to the second floor. There is a small kitchen where you can play with some toys.

3) Stickers

When you are ready, we will move to our special room called the “Exploration Lab”.

Here, we will put some stickers on your back to measure how fast your heart goes and we will ask you to wear a dinosaur or a rainbow hoodie.

4) Tablet & EEG

At this point we will be ready to move to the EEG room. Here, you can play some games on the tablet.

And watch some videos on the screen while wearing a special cap and a little buzzer on your finger which gives a small vibration (like a mobile phone).

The special cap can see what is happening in your brain and it looks like this:

5) Break

Now it is time for a break in the kitchen, remember to bring your favourite snack!

6) More games

After your break, we will go back to the Exploration Lab to play some games together. We have got a lot of boxes full of toys and activities to show you!

7) Well done!

At the end of the day, you will receive a certificate for being such a great scientist and a thank-you gift!
